

Capped T&M work order

Term and identity

Capped T&M work order: Identity and access engineering. Supplier Lumenquay Identity Systems; buyer Meridian Vale Financial Group. Original fictional terms. Annual scope is delivered in approved work packages during the multi-year term.

Field	Synthetic value
Framework / order	FA-005 / ORD-005
Contract / SOW	CTR-005 / SOW-005
Supplier / vendor ID	Lumenquay Identity Systems / V-005
Customer	Meridian Vale Financial Group
Service / owner	SVC-005 / Identity product owner (OWN-005)
Commencement / expiry	2025-01-01 / 2026-10-13
Renewal notice deadline	2026-07-15 (90 calendar days before expiry)
Renewal mechanism	Explicit written renewal required
Commercial model	Capped time and materials
Contacts	v-005@example.com; owner-005@example.com
Service locations	US-East, India-West and UK-South
Version / as-of	2.0 / 2026-09-28

Order precedence for this invented pack: an approved change note overrides only the provisions it identifies; then this SOW, its named schedules and the fictional framework apply. Ambiguity is referred to the commercial owner.

Capped T&M work order (continued)

Capped pricing and ordering

Only approved actual hours at the role rate card are payable. Alert at 80% of the annual ceiling; work beyond the ceiling needs prior written approval. Materials are excluded.

Annual commercial baseline	USD / rule
Forecast / base	\$3,300,000.00
FY2025 actual	\$3,600,000.00
Approved uplift ceiling	\$300,000.00
Payment terms	Net 60 days; Monthly in arrears
Workforce allocation	12 billable assignments + 0 non-billable shadows

Role	Rate per approved hour
IAM architect	\$220.00
Integration engineer	\$175.00
Access test analyst	\$140.00

Annual approved ceiling: \$3,600,000.00. Signed timesheets and task IDs are required; monthly finance records are invoice summaries, not detailed time sheets.

FY2025 invoice summaries are monthly allocations. Gate funding, accepted units or approved timesheets determine entitlement; forecast is not a minimum purchase. Positive adjustments need CCN-005-2025; negative variances reflect reduced authorized scope or quantities.

Resource allocated monthly fees are cost attribution only, not the contractual rate card or salaries. Forecast excludes tax. The annual baseline is not total multi-year contract value.

Capped T&M work order (continued)

Capped scope and acceptance

In scope: Maintain identity integrations; remediate approved access defects; report review exceptions.

Excluded: Granting privileged access without customer approval.

Output	Specific acceptance test
Federation adapters	Eight relying-party integrations pass signed SAML/OIDC test cases
Access remediation	All 40 approved exceptions closed with reviewer evidence
Privileged access tests	Negative tests deny all unauthorized roles; security owner signs results

Required delivery roles: IAM architect, Integration engineer, Access test analyst.

Cadence: Monthly ordering and evidence review; quarterly scope review. The annual quantity or roster baseline is reconciled at year end.

Acceptance: Identity product owner reviews evidence within ten business days. Written deficiencies require correction and retest. Silence is not acceptance.

Capped T&M work order (continued)

Commercial and control terms

Renewal: the current term ends 2026-10-13. Notice is due 2026-07-15; the notice requirement is 90 calendar days. Renewal requires a new written approval.

Convenience termination: 90 calendar days written notice. An early exit fee of 2 monthly base fees applies only to a convenience exit before term end. Transition services require an approved scope and must not be assumed free.

Schedule 3 service levels: see V-005_sla_risk_pack. The main service target is 98.0% monthly approved access tests passed. A material incident requires notification, restoration coordination and a written cause/remediation record. Credits are estimates until validated under the service schedule.

Data and access: use least-privilege access, approved locations and documented retention. This dataset contains only artificial records. No actual customer, payment card, credential or protected personal data is included. Any proposed expansion of data processing requires review before access.

Continuity and exit: maintain current process or application maps, tested fallback instructions and named owners. Provide an inventory and reversible knowledge-transfer plan before transition. No alternative supplier is deemed interchangeable solely because capability keywords match.

Special condition: continuity evidence must be refreshed before renewal because the service supports critical applications.

Approval record: customer role Identity product owner and supplier role Service Director are the intended approvers. Signature fields are deliberately not executed. All acceptance and governance states in the dataset are fictional fixture states.
