Order precedence for this invented pack: an approved change note overrides only the provisions it identifies; then this SOW, its named schedules and the fictional framework apply. Ambiguity is referred to the commercial owner.

Fixed-price scope and acceptance

In scope: Build 12 executive dashboards and 25 governed KPIs; operate scheduled refreshes.

Excluded: Approval of business definitions and source-system data corrections.

Output	Specific acceptance test
KPI semantic model	25 measures have signed definitions, grain and source lineage
Executive dashboards	12 dashboards reconcile to approved finance totals within \$1
Security and refresh handover	All eight role personas pass access tests; refresh completes by 07:00 UTC

Required delivery roles: BI lead, Dashboard developer, Analytics tester.

Gate	Target from annual kickoff	Budget allocation
SOW-012-D1	Week 4	25% / \$600,000.00
SOW-012-D2	Week 16	50% / \$1,200,000.00
SOW-012-D3	Week 24	25% / \$600,000.00

Each annual wave starts with a buyer-approved kickoff and source-access checklist. Delay of a prerequisite triggers a recorded replan; it does not imply acceptance.

Acceptance: Analytics owner reviews evidence within ten business days. Written deficiencies require correction and retest. Silence is not acceptance.

Fixed-price pricing and ordering

Annual delivery-wave price is fixed for the stated outputs; monthly progress instalments total that price. Final acceptance remains mandatory; failed outputs are corrected at supplier cost. No automatic hourly overrun billing.

Annual commercial baseline	USD / rule
Forecast / base	\$2,400,000.00
FY2025 actual	\$2,640,000.00
Approved uplift ceiling	\$240,000.00
Payment terms	Net 30 days; Monthly progress instalments
Workforce allocation	9 billable assignments + 0 non-billable shadows

FY2025 invoice summaries are monthly allocations. Gate funding, accepted units or approved timesheets determine entitlement; forecast is not a minimum purchase. Positive adjustments need CCN-012-2025; negative variances reflect reduced authorized scope or quantities.

Resource allocated monthly fees are cost attribution only, not the contractual rate card or salaries. Forecast excludes tax. The annual baseline is not total multi-year contract value.

Commercial and control terms

Renewal: the current term ends 2027-08-24. Notice is due 2027-07-25; the notice requirement is 30 calendar days. Automatic renewal applies only if no timely notice is received.

Convenience termination: 90 calendar days written notice. An early exit fee of 0 monthly base fees applies only to a convenience exit before term end. Transition services require an approved scope and must not be assumed free.

Schedule 3 service levels: see V-012_sla_risk_pack. The main service target is 98.0% monthly dashboard refreshes completed on time. A material incident requires notification, restoration coordination and a written cause/remediation record. Credits are estimates until validated under the service schedule.

Data and access: use least-privilege access, approved locations and documented retention. This dataset contains only artificial records. No actual customer, payment card, credential or protected personal data is included. Any proposed expansion of data processing requires review before access.

Continuity and exit: maintain current process or application maps, tested fallback instructions and named owners. Provide an inventory and reversible knowledge-transfer plan before transition. No alternative supplier is deemed interchangeable solely because capability keywords match.

Special condition: business acceptance and location/process coverage must be checked before consolidation.

Approval record: customer role Analytics owner and supplier role Service Director are the intended approvers. Signature fields are deliberately not executed. All acceptance and governance states in the dataset are fictional fixture states.
